PRE-ORDER CHECK LIST

Thankyou for your interest in obtaining a Raptor FJ Cruiser Flash Tune.

Before you order your Raptor Flash Tune we need certain information from you,
to be able to check and confirm our Tune is compatible with your vehicle.

The most critical information is the Vehicle Calibration Identification Code, which is specific to your FJ's ECU.
To obtain the CAL ID, you will need to use an engine scanner and be able to access the ECU to read the CAL ID. Some simple code readers are not powerful enough to scan for these codes, you may need to borrow or buy a decent engine scanner. The scanner needs to be able to read your FJ's Vehicle Identity, using the OBDII protocol – Mode 9.

Here is a picture of what the CAL ID should look like

It will also assist us if you can also supply the following secondary information about your FJ

1. VIN Code
2. Build date
3. ECU Code number, from the side of the ECU itself
4. If you are on any FJ Forum, your Forum name
5. Your full name, address, and email address

Once we have this data we will be able confirm if our Raptor Tune is suitable for your vehicle and we can proceed with completing your purchase and installation

If you have any questions please do not hesitate to contact us @ RaptorSC@westnet.com.au
